Welcome to Scolmore® Group

Scolmore® Group is the UK's leading manufacturer of electrical accessories, circuit protection, lighting, home automation, fire, security and cable accessory products. Established in 1989, the award-winning organisation designs, develops and manufactures an ever-expanding range of innovative, energy-efficient and time-saving solutions for domestic and commercial projects. Today, the Scolmore® Group incorporates Click® wiring accessories, Elucian® single and three phase consumer units and protective devices, Ovia® lighting and lighting controls, Unicrimp® cable accessories and ESP® security solutions, including the Espire® fire and CO alarms, and the Sangamo heating controls and time switches.

Scolmore® Group is committed to only distribute through the wholesale channel, which is set up to supply and service the professional electrical contract market. This joint partnership guarantees partners a range of high-quality, value-for-money products that are backed up by excellent local stocks and fast delivery service.

About Scolmore® Group

Since our incorporation in 1989 we have become a significant force in the electrical accessory market. We're proud to be a British based, family-run business, with an excellent track record of listening to what our customers need and providing the right solution every time.

As technology continues to drive the electrical industry, with the focus on smart homes and building automation, Scolmore® Group's investment in R&D ensures that the very latest technologies are harnessed to provide installers, contractors and specifiers with the most cost-effective, time-efficient solutions across a broad range of domestic and commercial applications.

Central Location - England

Based in the Midlands at our purpose built 48,000 sq ft Head Office and 150,000 sq ft Warehouse and Distribution Centre, we are ideally located to design, develop, manufacture and distribute our ever-expanding product range throughout the UK.

A Peoples Business

Scolmore® Group is a company that revolves around people – our team, our customers and the strong relationships we build and maintain through our consistent high levels of service and delivery.

CEO, Gary Mordue strongly believes the dedication and skills of his team have contributed to the continuing success of Scolmore® Group:

“The company is very much built on people. Each individual makes a unique contribution to the business and its customers. The professionalism, skills and knowledge of our team throughout the business allow us to deliver every customer the product they need, when they need it, high quality at the best price.”

The Home of Quality

We are committed to providing a comprehensive range of reliable, high quality and competitively priced products to our customers, whilst also offering a bespoke design and manufacture service to ensure we provide exactly the right solution and product for any installation or project. We're proud to say our customers can trust Scolmore® Group to get the job done.

Scolmore® Group's sustainability efforts have been awarded with a Bronze medal by EcoVadis, a global leader in business sustainability assessments, placing the company in the top 35% globally.

The EcoVadis assessment evaluates 21 sustainability criteria across four core themes: Environment, Labour & Human Rights, Ethics and Sustainable Procurement. In each of the four themes, Scolmore® Group saw its scores rise significantly from 2022 when it was first awarded its Bronze medal. More than 130,000 companies globally have been rated by EcoVadis.

EcoVadis' business sustainability ratings are based on international sustainability standards such as the Ten Principles of the UN Global Compact, the International Labour Organisation (ILO) conventions, the Global Reporting Initiative (GRI) standards and the ISO 26000 standard. The ratings provide an evidenced-based analysis on performance and an actionable roadmap for continuous improvement.

“We have been in a fortunate position over the past few years that both revenue and market share have increased, despite the many macroeconomic challenges that we have encountered along the way. We are keen to continue to grow our business sustainably in line with company growth and contribute positively to society whilst we are on our journey. The latest EcoVadis medal endorses the work we have done so far in making our business offer sustainable. It bolsters our commitment to making a positive impact and embedding corporate sustainability into our culture, strategy and day-to-day operations across the Group. As part of our ongoing commitment to sustainability, we aim to build upon this recognition by further enhancing our CSR initiatives and strive for higher levels of EcoVadis certification in the future.”

- **Manuela Rubino Courtney, Group Legal and Compliance Manager with Scolmore® Group.**

ISO14001 CERTIFICATION FOR SCOLMORE GROUP COMPANIES

ISO14001 is the internationally recognised standard for Environmental Management Systems (EMS), aiding organisations in enhancing environmental performance. Scolmore® Group's attainment of this certification reflects its dedication to integrating sustainability into its culture, strategy and day-to-day operation across the Scolmore® Group of companies.

Scolmore® Group's adherence to ISO14001 showcases its proactive approach to reducing environmental impact, meeting legal requirements, and fulfilling environmental goals. This framework addresses resource usage, waste management, environmental performance monitoring and involving stakeholders in environmental commitments.

ISO14001 offers a structured approach for businesses to address global challenges and environmental concerns. As well as signalling a commitment to compliance and ongoing environmental improvement, the adoption of this standard also serves to enhance an organisation's reputation, demonstrating a commitment to a sustainable future.

ISO 9001 ACCREDITATION

ISO 9001, awarded by certification body NQA, is a globally recognised standard for Quality Management Systems (QMS), with over 1.1 million certificates issued worldwide. It ensures a common-sense approach to the management of an organisation to consistently satisfy customers and other stakeholders.

“We will continue to maintain and improve our environmental management systems in order to continue meeting the rigorous ISO14001 criteria for years to come.”

- **Manuela Rubino Courtney, Group Legal and Compliance Manager with Scolmore® Group.**

The Scolmore® Group Companies

Since our incorporation in 1989 we have become a significant force in the electrical accessory market. We're proud to be a British based, family-run business, with an excellent track record of listening to what our customers need and providing the right solution every time.

The Home of Wiring Accessories

Click® is a leading manufacturer of electrical accessories, supplying a comprehensive range of wiring accessory products to suit all levels of budget, style requirements and finishes.

Wiring Accessories (Ireland)

Click® Litehouse work in proud partnership with Scolmore® International and supply a complete range of the market leading "Click®" family of wiring accessories.

Wiring Accessories & Lighting

Following six years of successful trading in the Middle East, Scolmore® Group opened a head office and warehouse facility in Dubai. Scolmore® Middle East is located in the heart of Dubai in the Business Bay area.

Lighting Solutions

Established as an independent lighting company in 2019, Ovia® brings to the professional electrical contract market an extensive range of high quality, competitively-priced lighting and lighting control products.

Fire, Security & Emergency Products

ESP® (Elite Security Products) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

Fire, Security & Emergency Products (Ireland)

ESPI (Elite Security Products Ireland) Ltd bring the extensive range of ESP® fire protection and security products to the whole of Ireland.

Lighting Solutions (Ireland)

Ovia® Ireland operates as a stand-alone business that replicates the Ovia® business operation in the UK with access to the same products, marketing support, technical support and new product development.

Cable Accessory Products

Established by the Scolmore® Group in 2014, Unicrimp® brings to the electrical contracting industry a comprehensive range of cable accessory products.

Electrical Distribution

Elucian® by Click® is a trusted partner in circuit protection. They offer an extensive range of reliable, user-friendly consumer units designed for seamless installation in both domestic and commercial settings.

Time Switches & Heating Controls

Founded in 1921 and proudly manufactured in the UK, Sangamo is recognised as one of the world's leading design and manufacturers of a wide range of electrical measuring and control equipment.

ScolmoreGROUP

Wiring Accessories

The Click® accessory range has something for everyone. From the basic functional moulded switch through to a sophisticated wiring solution found on one of our multi-tier MiniGrid® plates and everything in between.

GRIDPRO

Interchangeable Plates & Modules

The comprehensive range of GridPro® front plates and modules offers ultimate flexibility. With a wide selection of modules and finishes to choose from.

MINIGRID

Interchangeable Plates & Modules

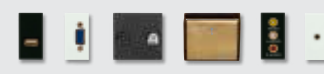

MiniGrid® modules are fitted as standard into our moulded Polar™, Mode® and Part M™ range. As well as our decorative Define®, Deco®, Deco Plus®, Definity™ and Metal Clad ranges.

new media

Media Cabling Solutions

The New Media™ collection encompasses a wide range of media and power modules, providing the designer and installer with a host of solutions for all manner of media cabling problems.

deco PLUS

Premium Decorative Metal Wiring Accessories

Deco Plus® is the premium range of decorative metal wiring accessories, which features smooth, contemporary curves that have wide-ranging appeal with contractors, specifiers and end users alike.

All Deco Plus® plates are available in Antique Brass, Satin Brass, Satin Chrome, Black Nickel, Stainless Steel, Polished Chrome, Polished Brass, Matt Black and Matt Bronze.

deco

Decorative Metal Wiring Accessories

A comprehensive range of decorative metal wiring accessories. Deco® is synonymous with high specification, high quality, long life and unprecedented value for money.

All Deco® plates are available in Antique Brass, Black Nickel, Polished Chrome, Stainless Steel, Satin Brass, Pearl Nickel, Polished Brass, Satin Chrome, Matt Black and Matt Bronze.

definity
COMPLETE

Screwless Wiring Accessories

The smooth, clean lines of Definity™ Complete products provide the ultimate finishing touch to a feature packed range of decorative domestic electrical accessories.

All Definity™ Complete plates are available in White, Metal White, Matt Black, Metal Black, Stainless Steel, Brushed Stainless, Polished Chrome, Antique Brass and Matt Bronze.

define

Decorative Flat Plates

The Define® range of flat-plate accessories offers up a host of new design opportunities with a comprehensive range of electrical accessory products.

All Define® Plates are available in Black Nickel, Brushed Stainless, Pearl Nickel, Polished Chrome and Stainless Steel.

25 YEAR No Quibble Guarantee

All Mode®, Part M™ and Polar™ wiring accessories are covered by our straight forward 'No Quibble Guarantee' against any fault in materials or manufacture experienced at any time within 25 years of the date of supply.

MODE®

Ergonomic Wiring Accessories

Mode® accessories have been developed as a high quality, flexible and modern solution to virtually any domestic wiring requirement. The smooth, modern lines of the accessory plate will fit into traditional and contemporary designs.

Part M Range™

Visually Contrasting Wiring Accessories

The extensive Mode® Part M collection of visually contrasting wiring accessories is designed to comply with current Building Regulations Part M. Part of the requirements of Part M is to aid disabled people within their surroundings, allowing them to activate a light, switch or control within arm's length.

polar™

Premium Bright White Wiring Accessories

The Polar™ range was born out of a desire to offer a bright white, distinctly different, wiring accessory product. Colour choice with wiring accessories is no different to colour choice of wallpaper, paints or other internal decorations. Installers have very definite views on just which tone or shade of white is right for a particular installation.

MEDICAL SOLUTIONS

Suitable for NHS Hospitals, Health Centres, Care Homes and GP Practices. Click® Medical Solutions consist of a range of Mode®, Part M™ and Polar™ wiring accessories.

Single & Three Phase Distribution

Elucian[®]
by Click[®]

A whole new product category was added to Scolmore[®] Group's portfolio in 2021 with the launch of Elucian[®] - a comprehensive range of single phase consumer units and protective devices. Following considerable success with the domestic Elucian[®] range, Scolmore[®] made further significant investment in the product category with the launch of an extensive range of Elucian[®] Three Phase metal distribution boards, protective devices and accessories.

Developed with the contractor as the focus, the Elucian[®] Three Phase Distribution Boards have been designed to deliver reliable performance, safety, and flexibility for larger residential, commercial and industrial installations. Built to meet the demands of modern electrical systems, they feature advanced protective devices and robust construction, ensuring compliance with the latest industry standards. With a range of sizes and configurations, they provide a versatile solution for managing complex power distribution needs.

Single Phase Consumer Units

Single Phase Protective Devices

Three Phase Distribution Boards

Three Phase Protective Devices

Single Phase Distribution

Elucian® Single Phase Circuit Protection is an extensive range of Consumer Units and Protective Devices, packed with advanced features for safety, flexibility, and reliability.

Consumer Units & Protective Devices

Elucian® Single Phase Consumer Units deliver reliable, easy-to-install circuit protection for domestic and commercial applications. Designed with safety and flexibility in mind, our range ensures top-tier performance for every installation.

Single Phase Circuit Protection Devices provide essential safety for every installation. Our range includes RCBOs, AFDDs, and SPDs, offering comprehensive protection against electrical faults and ensuring reliable performance.

Three Phase Distribution

Elucian® Three Phase products offer robust Metal Distribution Boards, Circuit Protective Devices, and accessories designed for commercial and industrial use. Our solutions are equipped with features that enhance convenience, flexibility, and safety.

Power & Lighting Distribution Boards

Our power and lighting boards are designed with efficiency in mind, featuring a built-in Energy Meter for accurate tracking. Each board is supplied with a pre-installed main incoming device, ensuring a seamless installation process while offering reliable and efficient energy management.

Bespoke Three Phase Distribution Boards

Our bespoke Three Phase Distribution Boards offer the freedom to create a power distribution solution tailored to your needs. Built with high-quality Elucian® products and designed by our in-house team of experts, we ensure a reliable, custom-built board to meet your exact requirements.

Sustainability drives all of our decisions and actions. We prioritise sustainability in all aspects of our business operations. Ovia® aims to become market leaders in sustainable lighting.

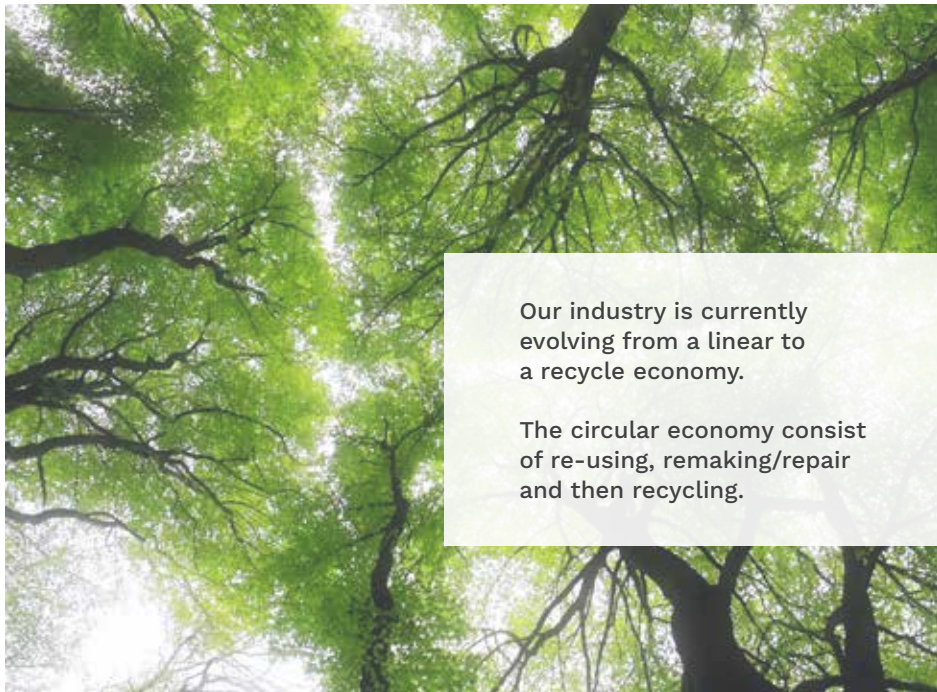

Switch to Inceptor®

Throughout our extensive range of lighting solutions we have a number of products that are part of our Pro Range which are identified by the name Inceptor®.

Inceptor® products were developed with the contractor in mind, providing some time saving installation features as a key design characteristics.

Look out for the switch to Inceptor® section on the packaging of all Pro Range products for details on all the additional features these products offer.

Our industry is currently evolving from a linear to a recycle economy.

The circular economy consist of re-using, remaking/repair and then recycling.

HOW TESTING WORKS

To test our products we complete the TM66 form created by CIBSE.

Testing involves gathering thorough evidence which supports the specifications of our product ranges and we provide reports.

We deconstruct our products to show the disassembly and material used. This also demonstrates the ability to recycle or refurbish the different materials.

The ecosystem of our company is also thoroughly investigated to navigate what we offer to support a circular economy, for example technical support, warranty lengths, photometry data and so on.

Why we use the LIA to verify our TM66 test results...

Gaining the correct score is important to us, it allows us to understand where we stand in the process of achieving more sustainable product ranges. Therefore we use the LIA to verify our results, this ensures we have a consistent and accurate rating without any bias towards the products.

We are proud advocates in using TM66 and have been given the opportunity to be founding partners, demonstrating our commitment to a circular economy for our industry.

Domestic Lighting

Ovia® hosts a selection of domestic lighting products. The range features everything from fire-rated downlights with pre-wired Flow™ connectors and integrated light source, IP65 downlights and cabinet lighting.

By utilising the colour temperature options and different light sources you are able to create many different mood settings for your living space.

Commercial Lighting

A comprehensive range of products for your commercial environment. Panel lighting and downlights with multiple features and benefits with a variety of installation methods, including recessed, surface or suspended. Ovia® has a solution for any requirement.

From cost-effective options to high specification solutions, our commercial range offers different colour temperature choices and IP ratings to cover a range of applications. For added convenience some lines come with pre-wired Push-Fit Flow™ connectors for speed and ease of installation and there are also options for an emergency version within this extensive range.

Industrial Lighting

With efficiency and project management in mind
Ovia's offer utilises some of the highest lumens per
watt (Lm/W) currently available.

Our selection of Highbay lighting has been created to suit a variety of applications and is suitable for suspending from ceilings or wall mounting using the appropriate bracket available. The fittings are IP65 rated and built for purpose with an IK10 rating in order to withstand knocks and bumps from machinery and personnel.

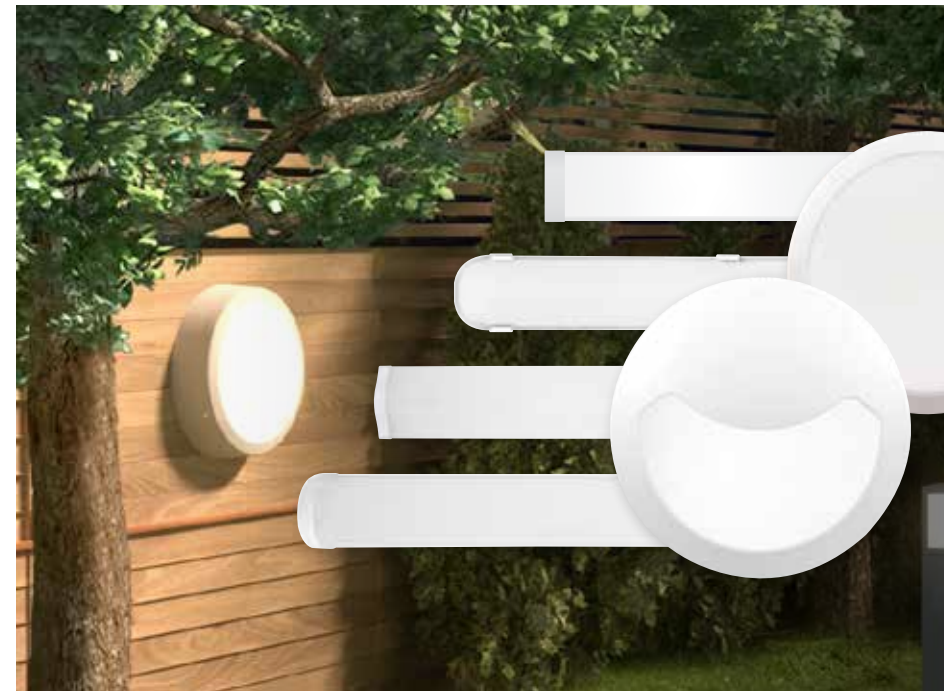

Dimmable options are also available using (0)-10V input to achieve the required light level. Microwave sensor options are available with a remote control to set bespoke settings. This provides energy saving and the option to create timed sequences allowing the light level to dim down and off as required.

All industrial products within the range are supported by generous warranties.

Utility Lighting

Meeting with contractor approvals our Utility range has been designed and developed utilising some of the fastest methods to assist with speed and ease of installation. A complete range of fluorescent equivalent products provides a solution for a wide range of retrofit and new installations. This range offers a multitude of features and a modern design including a pre-installed microwave option for automated control whilst saving energy. Emergency battery backup options are also available to assist with meeting compliance of BS 5266-1 code of practice for the emergency lighting of premises.

Controls

Achieving optimum lighting levels is a key consideration for any project involving lighting along with energy efficiency, cost effectiveness and the well being of any occupants.

Ovia® offers domestic, commercial and industrial solutions that are ideally suited for all modern-day lighting applications, and work seamlessly with new and existing lighting.

Designed to help improve security, save energy and money, our range of sensors will automate lighting with the help of linked microwave sensor installations.

Emergency Lighting

Our complete range of Ovia® Emergency products and batteries come with either a 4 year warranty or a 5 year warranty for products supplied with LiFePO4 Batteries.

All of our Emergency products are 'Self Contained'. A Self Contained Emergency sign or Luminaire contains all components such as the battery; lamp and control gear contained within the same housing or within 1 metre of the housing.

Flow™

The Flow™ range has been designed specifically to help contractors create more complex lighting installations quickly, easily and safely. It features a number of products that allow the quick connection, configuration and re-configuration of circuits, primarily intended for lighting.

Amenity Lighting

Safety and security were the main considerations for the creation of the Amenity range of lighting products with an emphasis on the aesthetics of the product portfolio. The range covers many applications, ranging from LED star lights through to external bollards and wall lights.

Floodlighting

An extensive range of powerful and efficient Flood, Wall Pack and Street Lighting, offering a wide range of solutions for external applications.

The Floodlighting range has a robust and varied aesthetics to suit any application, is fully IP rated offering protection against dust and moisture, and can be used both indoors and outdoors.

This modern range has high quality LED's installed, offering 30,000 and 50,000 hours (L70) lifetime and comes with up to a 5 year warranty.

Fire, Security & Emergency Products

Elite Security Products

ESP® has been part of the Scolmore® Group since 2011, and offers a comprehensive range of electronic security and fire detection products. The range comprises CCTV, Access Control, EVAC, Home Safety Solutions, Fire Protection, Emergency Lighting and Smart Security. The Sangamo range of specialist time switches and heating controls was added in 2018.

ESP® continues to invest across all product categories and its most significant new product development programme has resulted in the company entering the fire and CO alarm market with the launch of Espire® - a comprehensive range of high performance fire and CO alarm products, that has at its core quality, reliability and innovation.

Espire® Fire & CO Alarms

Fort® Smart Security

CCTV

Access Control

Disabled Refuge

Smart Security

At ESP® we create simple, smart solutions for a safer and more comfortable home. Discover a whole range of smart home products, from smart alarm kits, smart cameras, smart sensors and smart door bells, all working together to make your home smarter and safer.

ClickSmart⁺

All of ESP's Fort products are compatible with the Click Smart+ app.

CCTV

The ESP® CCTV range offers the installer a practical range of security and observation solutions reflecting the best features of established and emerging CCTV technology. The range includes cameras from 1080p (2 Megapixel) to 4K (8 Megapixel) using the latest in analogue and IP technology to deliver superior image quality. The 24/7 Colour CCTV range is available in 2, 5 and 8 megapixel resolution with a choice of white or grey housing.

Access Control

A complete and flexible range of superb quality video door entry equipment. Simple installation and high performance in colour, with the option of call points with integral PIN access, means you need look no further to find the ideal video door entry solution.

Disabled Refuge

Beacon consists of a comprehensive range of disabled refuge and assistance alarm products, that are specifically designed to aid people of impaired mobility to safely evacuate multi-story buildings in emergency situations.

Fire & CO Alarms

Espire® by ESP® has an outstanding product range that is guaranteed to have precisely what you need for fire and carbon monoxide protection. With their wide selection of products, which boast an array of innovative and cutting edge features, you can be assured of the best possible solution for any home safety requirements.

espire®

Fire Protection

The ESP® fire systems have been created to balance performance, reliability and aesthetics whilst being fully CPR compliant and certified to EN54 standards. The range includes everything required to complete high quality, durable, two wire, conventional and addressable fire alarm installations.

Emergency Lighting

The emergency lighting range provides contractors and installers with a comprehensive, contemporary array of products, that have been independently tested to comply with the latest industry standards and regulations. A Self-Test range is included within the emergency product listing.

Sangamo

Sangamo, the specialist supplier of time switches and heating controls, was acquired by the Scolmore® Group in 2018 with its range of products made available from group company, ESP® (Elite Security Products). This has made the Sangamo range much more widely and readily accessible to customers through the electrical wholesale channel.

Established since 1921 and based in Glasgow, Sangamo has built up an excellent reputation in the industry and offers an extensive product portfolio, which sits alongside ESP's growing range of Smart Security, CCTV, Access Control, EVAC, Fire Protection, Home Safety Solutions, and Emergency Lighting.

Sangamo has been manufacturing time switches at the Glasgow factory for over 65 years and today the company offers a wide range of time switches and heating controls for domestic, commercial and industrial use. Its location in Glasgow provides the Group with the perfect manufacturing base and regional office to service customers all over Scotland and the north, while at the same time providing them with access to meeting rooms and training facilities.

Round Pattern Time Switches

DIN & Panel Time Switches

Choice & Choice Plus Heating Controls

Powersaver Controllers & Powersaver Plus Timers

Round Pattern Time Switches

Sangamo have manufactured the renowned RPTS from our Glasgow factory since 1951, having sold over 11 million switches and counting. These 20A switches are famous for their high capacity, quality and reliability.

We often hear from customers who have had switches installed for over 5 decades and often on their second use, having outlived the equipment they were being utilised for.

Choice Plus Heating Controls

A Choice+ room thermostat regulates and maintains a desirable temperature throughout the home by calling for heat as the temperature varies throughout the day.

Choice+ thermostats include TPI feature to ensure a maintained temperature by analysis of the heating and cooling periods. They also include Optimum Start and Delayed Stop for additional efficiency, heating and cooling for the time programmed.

DIN & Panel Time Switches

All Sangamo's DIN Rail mountable time switches are designed for 35mm "Top Hat" rail. Switches come in 1, 2 or 4 modules, each module is 17.5mm wide, which fits the required width in the DIN enclosure.

The analogue 16000 range are simple to use and are a cost effective timer. They are extremely easy to set, change and to view programmes. They are often used where multiple people are involved in setting and changing programs.

Powersaver Plus Timers

The primary application for the Powersaver+ range is to control immersion heaters. In a typical UK household nearly 20% of a home's energy cost is spent on heating hot water. Leaving an immersion heater on all the time can be a significant waste of energy that can drive this figure up to 25% or higher.

Electrical Cable Accessories

Unicrimp®

Unicrimp® was launched by Scolmore® Group in 2014, with the aim of bringing to the electrical wholesale industry a comprehensive range of cable accessory products that would complement Scolmore's successful wiring accessories and lighting portfolios.

Since launch, the Unicrimp® range has been continually developed and expanded, and currently comprises three distinct product categories, with each one marketed under its own sub brand and all available exclusively through the electrical wholesaler channel.

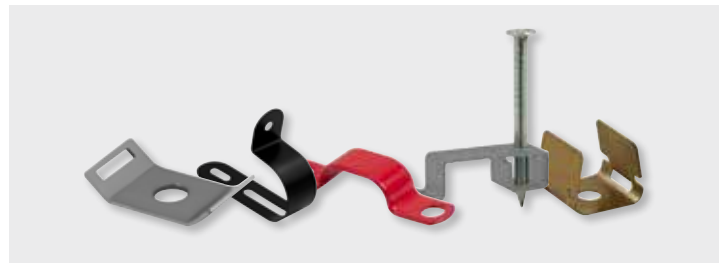

These are the Q-Crimp® range of cable and wire accessories, Q-Fire fire-rated and 18th edition compliant cable accessories and the Q-Nect range of lever connectors and connection boxes. Unicrimp® is also the exclusive distributor of the original, multi-surface sealant and adhesive brand, OB1™, through the UK electrical wholesale channel.

Aligned with the core values of the Scolmore® group of companies, Unicrimp® offers the same levels of outstanding customer service, high quality products and commitment to new product development.

Q-Crimp®

Q-Fire

Q-Nect

OB1™

Q-CRIMP®

A Comprehensive Range of Cable Accessories

All products within the Q-Crimp® range are manufactured under stringent quality control systems and are fully compliant with the very latest industry regulations.

The Q-Crimp® range includes:

- | | | |
|----------------------------|-------------------------|--------------------|
| • Conduit accessories | • Copper tube terminals | • Grommet & cleats |
| • Cable ties & accessories | • Cable clips | • Trade tubs |
| • Crimp terminals | • Brass & nylon glands | • Adhesives |
| • PVC tape | • Plugs & sleeving | • Earthing |

The Complete Fire Range

Q-FIRE

The Q-Fire range of fire-rated products provides installers with solutions that will help satisfy the latest IET wiring regulations. Providing everything required to harness cable between the consumer unit and the end accessory.

The Q-Fire range includes:

- Saddle clips & P-clips
- Fire safe cable clips
- Stainless steel mounts
- All-round banding
- Stainless steel cable ties
- Fire resistant expanding foam
- Fire safe metal cable cleats

Q-NECT

Strong, Quick & Reliable Solutions

The Q-Nect range offers great versatility for electrical connections. Each product is packed with features which makes your installations quicker and easier.

The Q-Nect range includes:

- 2, 3 & 5 way lever connectors
- IP66 weatherproof junction box
- 2 & 3 way IP connection boxes
- 5 pole, 3 way IP68 'T' & inline connectors

OBI

MULTI-SURFACE CONSTRUCTION SEALANT & ADHESIVE

Multi-surface Sealant & Adhesive

The No.1 hybrid sealant and adhesive by the trade, OBI™ bonds and seals a range of materials including aluminium, wood, plastic, metal, steel, mirror, lead, concrete, glass, tile, polycarbon, PVC and felt. OBI™ also works in damp conditions and even under water.

Available in 9 different colours. Also available are paint & varnish remover and multi-surface cleaner.

Wiring Accessories & Lighting

Scolmore® Middle East

Scolmore® Middle East is part of the Scolmore® Group - a globally recognised name in the electrical industry and the UK's leading manufacturer of electrical accessories, lighting, home automation, security and cable accessory products. Established in the UK in 1989, the award-winning Scolmore® Group organisation designs, develops and manufactures an ever-expanding range of innovative, energy-efficient and time-saving solutions for domestic and commercial projects.

Scolmore® Middle East supplies an array of products from Scolmore's core product ranges across the Middle East region through its trusted network of authorised distributors. These include ESP® Emergency Lighting, Click® Wiring Accessories, Ovia® LED Lighting, and Unicrimp® Cable Management products.

The company's established network of authorised distributors is key to delivering a broad range of products and support across the regions being served. There is a strong emphasis on providing exceptional service to valued customers to ensure they have access to a variety of marketing support facilities including comprehensive training across the breadth of products being supplied.

Simple, Stylish Wiring Accessories

The Seera® range is manufactured in the UK to the highest quality levels in our industry. Made from Polycarbonate with reinforced interior plates to ensure every product is robust, strong and durable. Seera® also has the additional benefit of being UV stabilised so that signs of ageing is not a problem.

BSI Approved Emergency Lighting Manufactured in the UK

Manufactured to the highest quality levels in our industry. Our new Product Development team are constantly tracking market trends, building regulations and approval standards so we can increase our product range to meet the ever-changing needs of our customers. Scolmore® Group prides itself on the innovative new products we are constantly developing which enhance the comprehensive ranges available.

The Home of Wiring Accessories

Click® is a leading manufacturer of electrical accessories, supplying a comprehensive range of products to suit all levels of budget, style requirements and finishes.

Electrical Cable Accessories

Established by the Scolmore® Group in 2014, Unicrimp® brings to the electrical contracting industry a comprehensive range of cable accessory products.

Lighting Solutions

Established as an independent lighting company in 2019, Ovia® brings to the professional electrical contract market an extensive range of high quality, competitively-priced lighting and lighting control products.

Fire, Security & Emergency Products

ESP® (Elite Security Products) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

ScolmoreGROUP

The Home of Wiring Accessories

Click® is a leading manufacturer of electrical accessories, supplying a comprehensive range of products to suit all levels of budget, style requirements and finishes.

Click® Litehouse

Click® Litehouse is a joint venture operation between Litehouse Accessories Ltd and Scolmore® International Ltd.

The company works in proud partnership with Scolmore® International and supplies a complete range of the market leading 'Click®' family of wiring accessories, which includes the Elucian® range of protective

devices and ClickSmart+ collection of smart home products. Click® Litehouse also supplies the comprehensive Unicrimp® range of cable accessory products.

The Click® Litehouse range of wiring and cable accessories, lamps and protective devices are all supplied exclusively via the electrical wholesale trade and a network of

approved stockists nationwide. All products are stored in our modern distribution facility based in Dublin.

The company strives to uphold its reputation for excellent service, high quality products and competitive pricing.

Electrical Cable Accessories

Established by the Scolmore® Group in 2014, Unicrimp® brings to the electrical contracting industry a comprehensive range of cable accessory products.

UNICRIMP®
ScolmoreGROUP

Fire, Security & Emergency Products Distributor based in Ireland

Elite Security Products Ireland

ESPi was set up in 2018 by Click® Litehouse, part of the Scolmore® Group. ESPI brings the extensive range of ESP® fire protection and security products to the whole of Ireland, via a dedicated team and through the various channels that serve the requirements of the industry across the country. The range comprises Smart Security, CCTV, Access Control, EVAC, Fire Protection, Home Safety Solutions, Emergency Lighting and the Sangamo range of specialist time switches and heating controls.

ESPi identifies and targets the security wholesale outlets responsible for supplying the various Private Security Authority (PSA) license-holding contractors that operate in southern Ireland and at the same time allows ESP® to continue to supply their existing electrical wholesaler customers in Northern Ireland.

Operating from Sandyford in Dublin in close proximity to Click® Litehouse, ESPI is a stand-alone business that fully replicates the ESP® business operation in the UK with access to the same products, marketing support, technical support and new product development.

Emergency Lighting

The emergency lighting range provides contractors and installers with a comprehensive, contemporary array of products, that have been independently tested to comply with the latest industry standards and regulations. A Self-Test range is included within the emergency product listing.

CCTV

The ESPI CCTV range includes cameras from 2 Megapixel to 8 Megapixel resolution using the latest in analogue and IP technology to deliver superior image quality.

Access Control

Simple installation and high performance in colour – with the option of call points with integral PIN access – means you need look no further to find the ideal video door entry solution.

Time Switches & Heating Controls

Founded in 1921 and proudly manufactured in the UK, Sangamo is recognised as one of the world's leading design and manufacturers of a wide range of electrical measuring and control equipment.

Home Safety Solutions

ESpire® offers a comprehensive range of electronic safety alarms, which are quick and easy to install, saving you time. Their outstanding product range is guaranteed to have precisely what you need for fire and carbon monoxide protection.

Fire Protection

The ESPI fire systems have been created to balance performance, reliability and aesthetics whilst being fully CPR compliant and certified to EN54 standards. The range includes everything required to complete high quality, durable, two wire, conventional and addressable fire alarm installations.

Smart Security

Discover a whole range of smart home products. From smart alarm kits, smart cameras, smart sensors and smart door bells, all working together to make your home smarter and safer.

Disabled Refuge

Beacon consists of a comprehensive range of disabled refuge and assistance alarm products, that are specifically designed to aid people of impaired mobility to safely evacuate multi-story buildings in emergency situations.

Lighting Solutions optimised for Performance, Energy Efficiency & Safety based in Ireland

Ovia® Lighting Ireland

Ovia® Ireland was established in 2021 on the back of growing demand for the Ovia® range of lighting and lighting control products across Ireland. The company brings the extensive range of Ovia® lighting products to the whole of Ireland, via a dedicated team and through the various channels that serve the requirements of the industry across the country.

Operating out of purpose-designed premises in Dublin, Ovia® Ireland operates as a stand-alone business that fully replicates the Ovia® business operation in the UK with access to the same products, marketing support, technical support and new product development.

The comprehensive collection of Ovia® lighting products covers a whole spectrum of projects in a broad variety of sectors, including domestic, commercial, industrial, utility, amenity, emergency lighting and floodlighting. The lighting offer is further enhanced with the inclusion of a full range of lighting control solutions that will optimise energy saving credentials.

A free Ovia® lighting design service is also available to provide expertise in choosing the right products and solutions to ensure that lighting schemes meet all the project's requirements.

Emergency Lighting

Ovia® Ireland has an extensive range of essential emergency lighting, ranging from bulkheads to hanging signs, our range will maintain power for those crucial moments.

Floodlighting

Ovia® Ireland has an extensive range of powerful and efficient Floodlights, ranging from 10W – 300W. Fittings are available in a range of finishes and colour temperatures making it a versatile range.

Industrial Lighting

With efficiency and project management in mind, Ovia® Ireland's offer utilises some of the highest lumens per watt (Lm/W) currently available. All industrial products within the range are supported by generous warranties.

Controls

Ovia® Ireland offers domestic, commercial and industrial solutions that are ideally suited for all modern-day lighting applications, and work seamlessly with new and existing lighting.

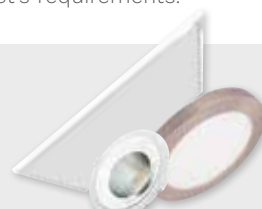

Domestic Lighting

Ovia® Ireland hosts a selection of domestic lighting products. The range features everything from fire-rated downlights with pre-wired Flow™ connectors and integrated light source, IP65 downlights and cabinet lighting.

LED Lamps

Ovia® lamps are quality assured and comply with multiple credible and internationally recognised electrical standards. Certified and approved for use in the European market, the safety, quality and usability of our lamps are guaranteed.

Commercial Lighting

A comprehensive range of products for your commercial environment. Panel lighting and downlights with multiple features and benefits with a variety of installation methods, including recessed, surface or suspended. Ovia® Ireland has a solution for any requirement.

Amenity Lighting

Safety and security were the main considerations for the creation of the Amenity range, which covers many applications, ranging from LED star lights through to external bollards and wall lights.

Utility Lighting

Meeting with contractor approvals our Utility range has been designed and developed utilising some of the fastest methods to assist with speed and ease of installation. A complete range of fluorescent equivalent products provides a solution for a wide range of retrofit and new installations.

Hospital theatres benefit from Click Scolmore® medical solutions

The total refurbishment of two UCV (Ultra Clean Ventilation) operating theatres at Conquest Hospital in St Leonards on Sea, East Sussex, was completed in 2022, with wiring accessories from Click Scolmore’s growing medical solutions range specified and installed.

A number of double, unswitched Mode® blue medical sockets, red outboard rocker sockets and white outboard rocket sockets have been installed in the walls around the theatre to accommodate the numerous devices and appliances that need to be powered.

In line with the requirements, the blue medical sockets feature laser-etched white lettering stating, ‘Medical Equipment Only’. Blue ‘Medical Equipment Only’ Sockets are designed to distinguish them from non-IPS electrical sockets. This helps ensure medical equipment is plugged into IPS sockets and non-medical equipment is plugged into non-IPS sockets.

Double supplementary equipotential bonding earth connection points were also installed, along with EBBs (Equipotential Bonding Busbars). EBBs play a major role in ensuring patient and clinician safety.

The white moulded Mode® wiring accessories specified for this project are manufactured using Urea Formaldehyde, which has similar inherent properties to antimicrobial additives that inhibit the growth of infectious diseases. All products independently tested achieved a 99.99% kill off rate across all four types of the strains of bacteria – MRSA, E-Coli, Salmonella and Klebsiella Pneumonia.

Responsible for specifying the Mode® and GridPro® products for the hospital theatres unit was Mark Sellens, electrical project manager at electrical contracting firm, Booker & Best Ltd and he worked closely with the project manager for the Trust, John Harratt.

Scolmore® lends a helping hand to family in need

The popular BBC TV series DIY SOS: the big build, recently shone a light on the plight of a family in Morpeth, Northumberland, struggling to cope in a house that was not fit to accommodate them.

Four generations of the family needed to live together to provide support for each other with their various and complex medical and mental health needs. However, the house was neither big enough nor safe enough for them and resulted in the grandmother and great grandmother having to move out. This is where DIY SOS and its band of volunteering workers and suppliers came together to make the family’s dream of a shared life together come true.

Scolmore® has had a long association with the show, with resident sparky, Billy Byrne, a regular visitor at the company’s offices and events. Through Billy, Scolmore® supplied more than 100 different electrical accessory products for installation in the newly transformed home. The Deco wiring accessories collection in an antique brass finish were selected for the project, including socket outlets, switches, TV points, a cooker switch and fan isolator switch.

Tony Forsythe was the Project Manager overseeing the work to transform the family’s home and he had this to say: “I was amazed by the quality of construction, the luxury feel, the generous sized terminals as well as the quality of the terminations. The finish to the Deco accessories is absolutely stunning and, in my opinion, they stood out as a feature against the surroundings.

“I think these have to be the best decorative accessories I have fitted. They provide a high end look at a very good, competitive price. Stunning looks and a joy to fit, is how I would sum them up.”

Blue Bay Travel is an award-winning UK tour operator, which launched in 2003. The business has grown significantly in recent years, and its stylish offices in Trentham, Staffordshire, now houses a team of 120 staff.

During a programme to upgrade the head office premises - which comprises a total of four individual office buildings - the installation of a range of Duceri emergency lighting products from leading industry supplier, ESP, was undertaken.

Martyn Walley, managing director of electrical contracting firm Hide Ltd, had overall responsibility for the project and worked closely with ESP’s design and technical teams to come up with a suitable emergency lighting scheme. It was agreed that a self-test system would be more suitable, to avoid any impact on the day-to-day operational requirements of the offices. Self-test emergency light fittings offer numerous benefits over standard fittings by reducing the costs and time associated with manual testing and inspection.

The emergency lighting system was installed through all four office blocks utilised by Blue Bay Travel. The Duceri 9W LED IP65 Non-maintained 3Hr Self-Test Emergency Twin Spot was selected for the general office. For the main door the Duceri 3W LED IP65 Non-maintained 3Hr Self-Test Emergency Bulkhead was installed, while for the rest room facilities, the Duceri 3W LED 3Hr Self-Test Emergency Open Lens Downlight was selected.

A recent project to deliver a major refurbishment and new build of a hangar at London Southend airport included a lighting scheme provision, and Ovia was the number one choice of the contractor leading the works.

The company responsible for the electrical installation was Kent-based Prowired Electrical Contractors, who undertook the project following the relocation of a specialist aviation company to the Southend Airport site.

A long established relationship between Ovia’s regional sales manager for the area, Reg Oldrey, and Danny Edmonds, director of Prowired, led to Ovia securing the lighting part of the project.

Commenting on the collaboration with Ovia, Danny Edmonds, said: “There were very tight deadlines on this particular project. We knew, however, that we could rely on the ability of Ovia to quickly come up with the right lighting design scheme for the job and to deliver the right products in the right quantities at just the right time.”

17 of the Ovia Grus 100W LED 1-10V Dimmable Highbays along with 6 Emergency versions were fixed to the ceiling of the hangar using the surface brackets. For the emergency lighting provision 2 of the 4W Emergency LED Maintained Box Exit Signs in white were chosen.

For the office area Ovia specified the TP(a) rated Inceptor Slate Low Glare LED Backlit Panels, with 35 of the fittings installed to meet the requirements.

In the staff room 2 of the Jura 30W LED Panels were chosen, along with 4 of the 3-hour emergency conversion packs. Lighting requirements for the WC facility on the site were catered for with 1 of the 24W IP44 recessed AluPanel downlights in the 300m diameter option, as well as 3 EVO Slim 16W IP65 Bulkheads.

Finally, to provide security lighting for the exterior of the hangar and surrounding area, 7 of Ovia’s 50W IP44 LED Pathfinder Floodlights with PIR sensor were installed.

Danny Edmonds continues: “The process from start to finish with Ovia was seamless as always. From the design to delivery, we had peace of mind that we could complete this job with the excellent standard that we strive to achieve.”

Sales Office

Based alongside our distribution facility, the busy sales office provides a central point of contact for all customer service requirements. The professionalism, skills and knowledge of our internal sales team enables us to provide the high standard of service that we know our customers expect. Our online ordering facility is also managed within this office.

Sales Structure

The external sales team has been expanded and restructured to enable Scolmore® Group to meet the ever changing needs of the market. As a result the sales force is now able to offer dedicated team members for distributors and contractors at local level, as well as for national accounts and also provides specification contacts to generate demand with specific customers. This gives us the ability to have a focused approach in line with our business development plan.

“At Scolmore® Group the whole business is focused on the customer. Our forward thinking and investment for the future together with our dedicated employees enable a dynamic working environment that provides the platform for continued growth. It is our aim to provide the best possible package of products and service for our distributors and the installers who purchase and fit our products, ensuring that everyone gains maximum benefit when choosing Scolmore® Group.”

- Gary Mordue, CEO Scolmore® Group

In-House Studio

All marketing support including product literature and point of sale material is designed by our dedicated in-house design team. This facility enables us to offer bespoke marketing support to our customers. The availability of an online Marketing Hub provides stockists of Scolmore® Group products with a range of tools to enhance their own marketing activities.

Product Development

Scolmore® Group products are designed with our customer/the installer very much in mind. Our purpose built facilities and dedicated product development team, based in the UK allow us the flexibility to design and develop these products based on customer feedback and market research, ensuring we are producing a relevant, reliable and quality range of products.

Distributor Network

Scolmore® Group has over 2000 trading accounts providing a comprehensive network of wholesale outlets covering the whole of the UK. These are a combination of Independent Wholesalers, National Wholesale Groups and Buying Consortiums. The company sales strategy is to ensure that all Scolmore® Group products are available local to the requirements of the installer and specifier.

Warehouse/Service

Our centrally located 150,000 sq ft Warehouse and Distribution Centre allows us to deliver our products on time, every time.

Stock

Over 16,000 Click® product lines with a stock value in excess of £18 million are held at our Central Distribution Centre in the West Midlands at any one time. This means we are able to offer 97% availability on stock at any given time.

ANTIBACTERIAL & ANTIVIRAL CERTIFIED

Antibacterial Certified

Mode® wiring accessories are manufactured using Urea Formaldehyde, which has similar inherent properties to antimicrobial additives that inhibit the growth of infectious diseases.

All products independently tested achieved a 99.99% kill off rate across all four types of the strains of bacteria - MRSA, E-Coli, Salmonella, Klebsiella Pneumonia and enveloped viruses.

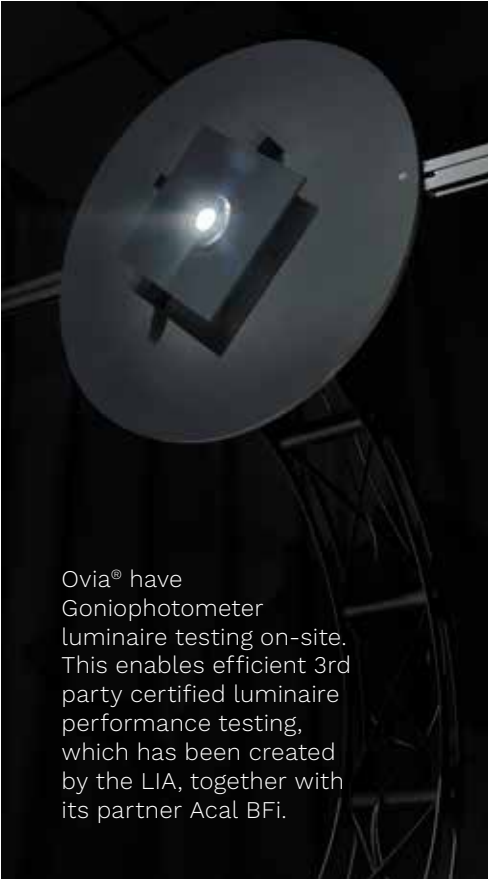

Antiviral Certified

After a contact period of 4 hours, Mode® was shown to have a 99.9% kill off rate against enveloped viruses and a 92% kill off rate against non-enveloped viruses. It has also achieved 99.98% kill off rate against Influenza A (H1N1) after a 24 hour period.

ANTIBACTERIAL & ANTIVIRAL CERTIFIED

Ovia® have Goniophotometer luminaire testing on-site. This enables efficient 3rd party certified luminaire performance testing, which has been created by the LIA, together with its partner Acal BFi.

Ovia® LIGHTING LABORATORY

Ovia® has made a significant investment in new testing equipment and a cutting-edge photometry luminaire testing scheme, built around the class-leading Viso systems LapSpion goniometer. Its cutting edge technology eliminates the need for a traditional goniometer and/or integrating sphere and allows manufacturers to perform these tests quickly and accurately on their own premises, without the need for a large dedicated dark room.

OVIA LIGHTING DESIGN CALCULATOR

FREE TO USE ON OVIAUK.COM

The Lighting Design Calculator is an easy-to-use tool, perfect for both wholesalers and contractors, enabling you to quickly generate lighting calculations and layouts in just a few minutes.

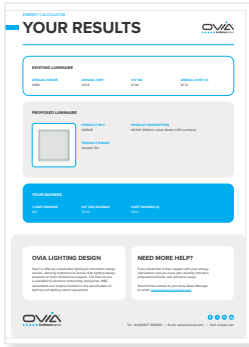

LIGHTING DESIGN CALCULATOR

Our lighting design calculator provides a detailed luminaire plan, showing the required quantity and optimal layout based on room dimensions. Results can be downloaded or emailed for easy reference and use.

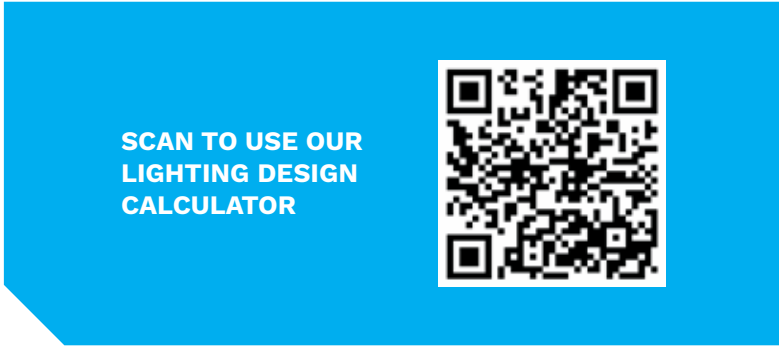

ADVANCED LIGHTING DESIGN CALCULATOR

Users can create an account to save and store their lighting plans for future reference, with the option to delete their account anytime. The tool provides detailed Ovia® product info, a visual luminaire layout, and allows results to be downloaded or emailed.

ENERGY CALCULATOR

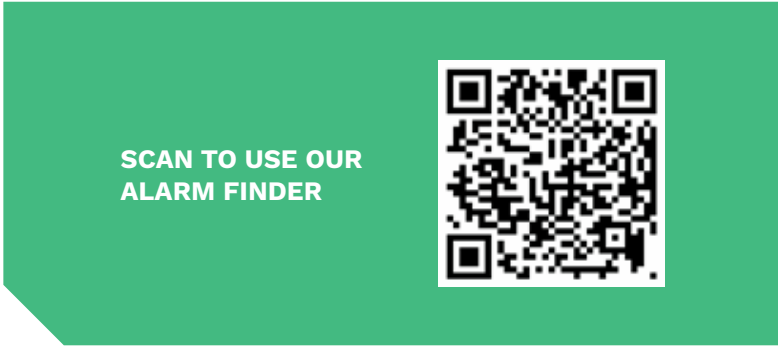

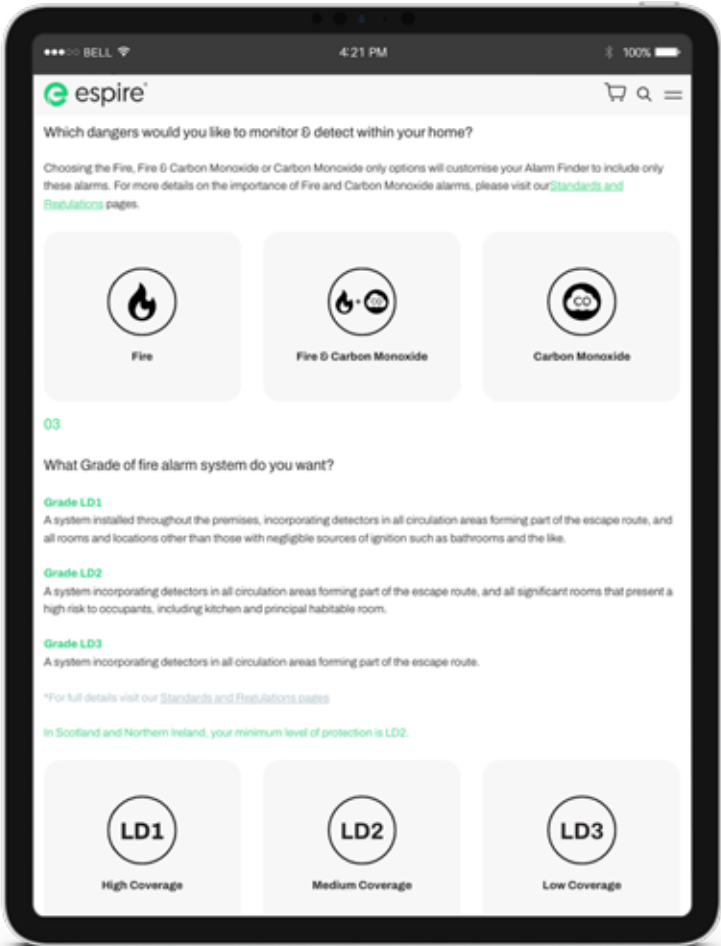

Compare the performance of existing and proposed luminaires to assess potential upgrades. The tool calculates annual savings in KWH, CO2 emissions, and costs, highlighting environmental and financial benefits. Results can be downloaded or emailed for easy tracking and sharing.

ESPIRE ALARM FINDER

FREE TO USE ON ESPIREUK.COM

The Alarm Finder helps you easily select the right Smoke, Heat, or Carbon Monoxide alarms for your home. By answering a few questions, you'll get tailored recommendations and guidance on the best placement for each alarm in a typical property layout, ensuring maximum safety and compliance.

PROUD TO BE ACCREDITED
WITH THE FOLLOWING...

Supporting Our Industry

Scolmore® Group is committed to supporting the electrical industry and on a regular basis is actively involved in a number of initiatives.

Scolmore® Group is pleased to be associated with the ELEX trade events. We are committed to the 6 ELEX regional shows: Alexandra Palace, Harrogate, Exeter, Bolton, Coventry and Sandown, where we welcome the opportunity to showcase our product range.

Supporting the CEF TechTalks and CEF Live offers the opportunity to demonstrate the latest products available from across the Group to current and new customers.

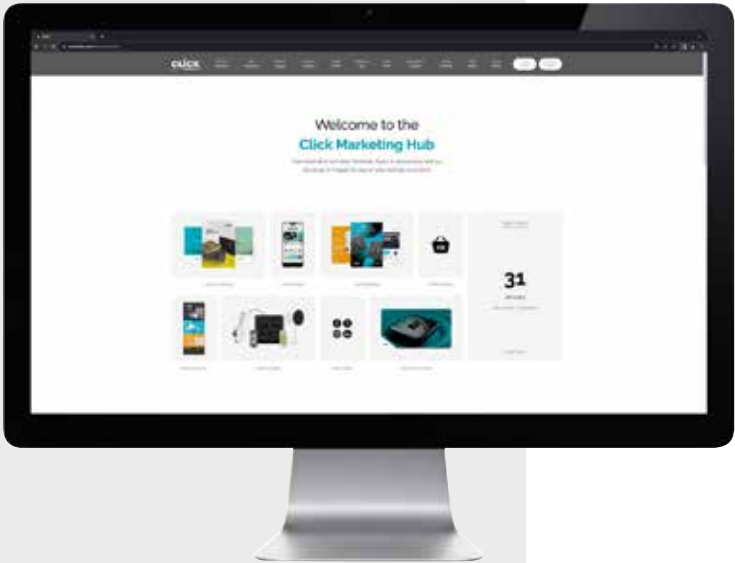

Supporting Future Electricians

As part of our commitment to help develop the next generation of electricians, Scolmore® Group is an official partner with SkillElectric and we have been supporting the organisation's competition to find the UK's best young electrician since 2018. This annual event, which is run in conjunction with WorldSkills UK, is designed to promote and showcase high standards and skills across the electrotechnical industry. It is organised by National Electrotechnical Training (NET).

Marketing Hub

The Marketing Hub is featured on all of the Scolmore® Group websites, giving customers the opportunity to enhance their own marketing facilities with very little effort or cost. A selection of flyer templates, product images, promotional videos and social media posts can be downloaded from the hub. This support provides maximum impact for our customers when optimising sales opportunities.

All The Latest Catalogues

The Marketing Hub has a dedicated product literature tab allowing you to download all of our latest catalogues as PDFs. These are all stored in one easy to find location with options to download only the relevant sections for you. Keep checking back when new products are launched for new information.

Full Product Image Library

Download all of our product images; each one saved by product code and at a perfect resolution for your website.

Print Ready Editable Promotional Leaflets

Promotional leaflets available for you to download, with editable sections so you can add your company's details.

Scolmore® Group App

The Scolmore® Group app allows you to use your smart phone to browse our complete range of products, add products to your Favourites or to the Quote Basket and allows you to email the contents of the basket back to yourself.

With Click®, Elucian®, Ovia® lighting, ESP® and Unicrimp® products available you can use the search facility to easily locate the products required.

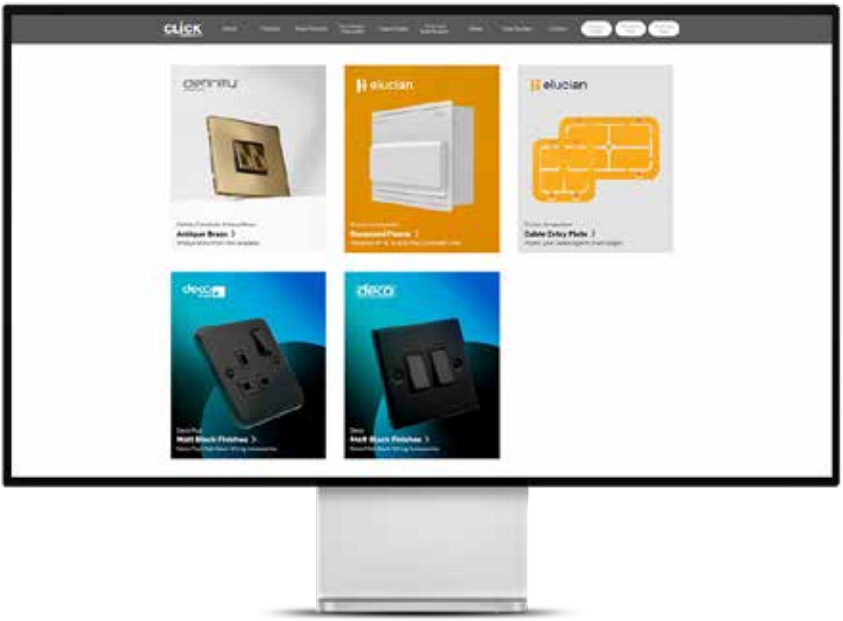

Our App also has a useful tool kit featuring:

Quick Quote Calculator, Zs Values, Cables Selection & Voltage Drop, Adiabatic Equation Calculator, Power Factor Calculator, KVA Converter, Lighting Cost Saving Calculator, Lighting No. Calculator and many more...

Scolmore® Group Website

All Group companies have their own dedicated websites, showcasing the company's full product ranges. We regularly update the websites with new products, as well as details of developments within our business. A number of useful resources are also available to download including specification sheets, BIM files and lighting design files.

The Scolmore® Group websites are a great source of information keeping you fully informed with a click of a button. A link to the companies Marketing Hub can be found via the company websites, providing access to downloadable catalogues, flyers, product images and more.

Online Ordering

The online ordering site incorporates a number of features that allow users to access information directly and easily:

- Ordering 24 hours a day 7 days a week with the ability to check current stock levels as required, meaning you are not restricted to ordering during normal office hours.
- Access to online catalogues will keep you fully updated with the complete product range and provide information on new products as and when they become available.
- The order tracking service keeps you up to date with the progress of your shipment.
- Managing your administration paper work is now even easier with instant access to reports and essential documents at a click of a button.
- A 'quick buy tab' and the ability to store the most common orders for repeated use adds to the versatility and flexibility of the revised system.
- PDF purchase order uploads are available. You can take your purchase order directly in PDF format and upload it to automatically extract the data and validate its contents.

To register please speak to one of our Area Sales Managers or your dedicated Customer Services representative.

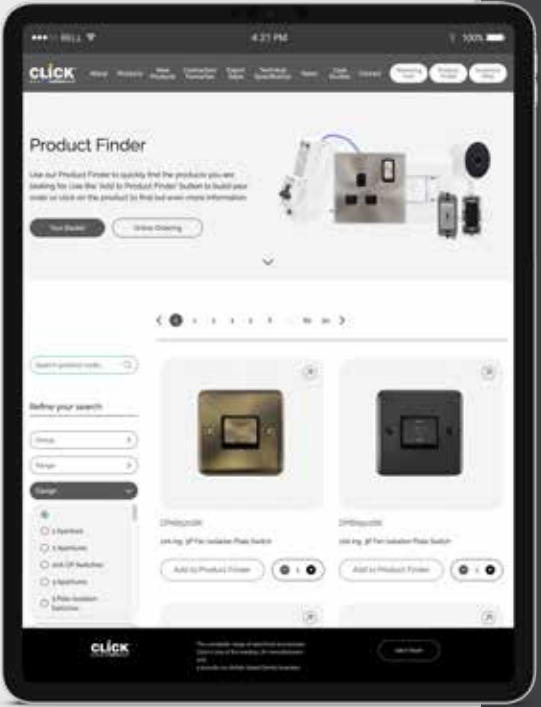

Product Finder

The Product Finder tool makes it easier than ever for electricians, wholesalers and end users to search and locate products from across all categories, with just a few clicks.

Users select the range they are interested in – wiring accessories, lighting, essentials or Click Smart+ – and can browse through every category with ease. They can also search by finish, product type, or even brand, adding products to the basket as they go along.

For the electrician, it allows them to create a basket which can then be exported as a CSV file to send to their wholesaler for a quote or a purchase. The electrician can also direct their end user customers to the site to browse the products and create a wish list of items they will need for a particular project. Once end users have finished adding products to their basket they can easily generate a PDF file to send to their electrician.

Every product listed under Product Finder has a downloadable specification sheet which includes the product code, description, a product image and full technical details.
