locking mechanism

Guards against accidental disconnection of computers, servers and most electrical appliances.

WHAT IS IEC LOCK®?

A unique patented mechanism for locking IEC connectors suitable for use with any standard C14 or C20 inlets.

- IEC LOCK is designed to help prevent accidental disconnection of computer and servers containing valuable data and critical equipment
- Unique 'patented' lockable Female C13, C15, and C19 connector 'IEC Lock®' Connectors and outlets
- Suitable for various Data Communications applications that require a secure power source
- Suitable to prevent vulnerable appliances becoming disconnected due to vibration

HOW IT WORKS

- Pull the tab back and then push the connector into any standard IEC inlet, release the tab and it is locked in position
- Connector **CANNOT** be accidentally pulled or vibrated out of the inlet
- Slide back the 'red' tab to release and remove connector from inlet

“Unique secure locking mechanism which provides connection integrity”

WHY IEC LOCK®?

Features & Benefits

Safety - IEC Lock® guards against accidental disconnection.

Various colours - available to help identify individual power sources.

Security - IEC Lock® protects appliances that are vulnerable to vibration.

Versatility – Retrofit solution that suits any standard IEC inlet.

Flexibility - Total flexibility in assembling cable types, length and colour.

LSZH - IEC Lock® rewirable version offers flexibility whilst being LSZH (low smoke zero halogen) compatible.

IEC LOCK C13 LOCKING CONNECTOR

"The average total cost of unplanned application downtime per year is \$1.25 billion to \$2.5 billion."

Features & Benefits

- Protects appliances that are vulnerable to vibration
- Connector cannot be accidentally pulled or vibrated out of the inlet

10A MAX / 250V (EU / Australia / Korea / China)

15A MAX / 125V / 250V (USA / Japan)

DUAL LOCKING C14 IEC LOCK CONNECTOR

Features & Benefits

- Secure Locking Side and Bottom Tabs
- C14 Connector cannot be accidentally pulled or vibrated out of the outlet
- Universal cable available H05VV-F 3x1.00mm² / SJT 3x17awg
- A European, USA & Canada, Australian, and Japanese approved Dual Locking C14 IEC LOCK Connector that will lock into most C13 outlets
- C20 Dual Locking
- Patent Pending

C15 IEC LOCK SLIMLINE LOCKING CONNECTOR

10A / 250V~ (Europe & Australia)
15A / 250V~ (Cul & Japan)

IEC Lock Appliance Outlet

Unique patented lockable female C15 IEC outlets guard against accidental disconnection of any standard C16 inlet. Protects appliances that are vulnerable to vibration by preventing accidental removal.

Features & Benefits

- Operates at high temperatures (Heat tolerance of up to 120 degrees celsius)
- Slimline C15 connector with Rear Release Mechanism.
- C15 Connector cannot be accidentally pulled or vibrated out of the outlet.
- A European, USA & Canada, Australian, and Japanese approved Locking C15 IEC LOCK Connector that will lock into any C14/C16 inlet.

PREVENTS ACCIDENTAL
DISCONNECTION

PREVENTS ACCIDENTAL
DISCONNECTION

SUITABLE FOR USE
WITH ANY C20/C22 INLET

IEC LOCK C21 LOCKING CONNECTOR

16A Max / 250V~ (Europe)

IEC LOCK+ C13 REWIREABLE LOCKING CONNECTOR

“Gartner recently estimated that the cost of IT downtime to businesses is around £4,300 per minute or £258,000 per hour”

Features & Benefits

- Rewireable - offering total flexibility when assembling cables
- Can be retrofitted
- LSZH - Low Smoke Zero Halogen
- Cable size up to 3 x 1.5mm² / 3 x 14AWG
- Up to 3 x 2.0mm² (Japan)

10A MAX / 250V (EU / Australia)

15A MAX / 125V / 250V (USA / Japan)

LOCKABLE OUTLET

MULTI-TIER C13 LOCKING OUTLET

Features & Benefits

- Space saving with easier accessibility
- Each outlet has an independent release locking mechanism
- The locking mechanism protects against accidental disconnection and maintains uptime
- The button to operate the mechanism is located to the side for easy access
- Nylon LSZH (Low Smoke Zero Halogen)
- 6.3mm Terminals
- 1.5mm panel thickness

10A MAX / 250V (EU / Australia / China)

15A MAX / 250V (USA)

12mm Saved

4 tier versions use 12mm less space than 4 individual IEC locks.

21mm Saved

6 tier versions use 21mm less space than 6 individual IEC locks.

SUITABLE FOR USE WITH ANY C14

IEC LOCK C19 LOCKING OUTLET

IEC Lock Appliance Outlets

Connectors and outlets can be used with standard IEC plugs and inlets. But for extra protection use both to ensure against accidental removal of power cables connected to PDU's, Servers, Network devices etc..

Features & Benefits

- Snap-in mounting from front
- Solder terminal or quick connect from single terminal
- Class 1 Protection
- Integral plug retention feature
- 6.3mm Terminals
- 1.5mm panel thickness

SUITABLE FOR USE
WITH ANY C20

CX PANEL MOUNT CONNECTOR

Capable of accepting
C14, C16, C20 & C22 plugs

Features & Benefits

- Secure Locking Side and Bottom Tabs.
- Prevents power cords being accidentally pulled out or working loose through vibration.
- Used on PDUs, servers and most network devices.
- Designed to fit 1.5mm panels.
- Will sit alongside the current PA13 and PA19 range.
